Damn Homie AI

Brain dump to game plan. Pick ONE lane. About 5 minutes.

Lane 1: Claude (best: remembers in Google Drive)

1. Go to **claude.ai** in your web browser and sign in. Free is fine.
2. Tap **Settings** then **Capabilities**. Turn on **Code execution and file creation**.
3. Tap **Customize** → **Skills** → **+** → **Create skill** → **Upload a skill**. Pick **damn-homie-ai.zip**.
4. Tap **Customize** → **Connectors**. Connect **Google Drive** and **Google Docs**.
5. Start a new chat. Say **"Brain dump:"** and everything on your mind.

Lane 2: Any other AI (ChatGPT, Grok, Gemini)

1. Copy ALL of **one-prompt.txt**. (Free ChatGPT: copy **one-prompt-short.txt**.)
2. ChatGPT phone app: **Settings** → **Customize ChatGPT** → turn on **Enable customization** → paste in **Custom Instructions** → **Save**.
   Grok: paste into Custom instructions. Gemini: make a new Gem, paste into Instructions.
3. Start a new chat. Brain dump.
4. Say **"save"** when you stop. Copy the card it gives you into your Notes app.
5. Next time: paste the card and say **"load"**.

Magic words: save · load · stop · go · brainstorm · where was I? · normal mode

Your stuff lives in a Google Drive folder called **Damn Homie** (Lane 1), or in the Save card you paste (Lane 2). Never put passwords in it.
